

SPSS: Cleveland dot plot (from a table)

This document will explain how to generate a Cleveland dot plot using SPSS a frequency table.

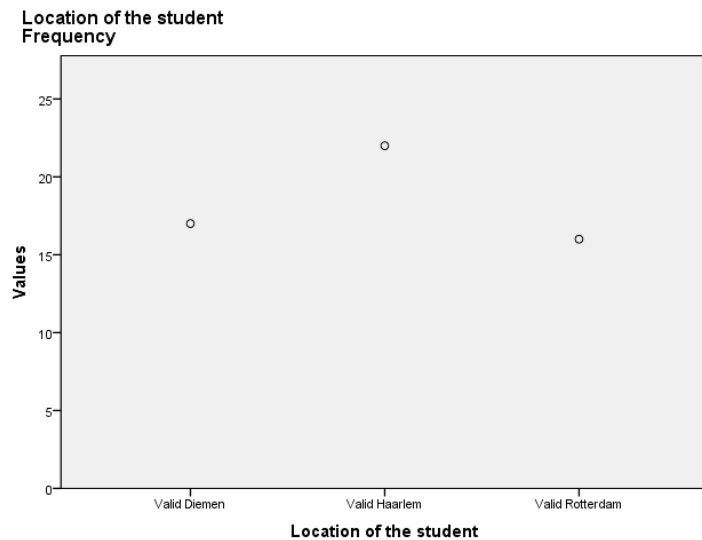

Figure 1. Example Cleveland dot plot generated with SPSS

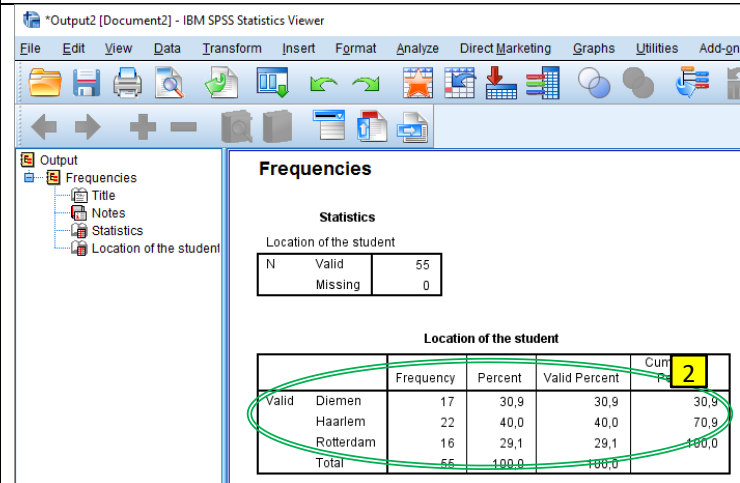

The described steps are also shown in the Youtube video at: https://youtu.be/pcWIC_ceVKA.

The example file used is *StudentStatistics.sav* available on the companion website <http://PeterStatistics.com>.

1. Create a frequency table of the variable (see separate instructions on how to generate a frequency table in SPSS)

<= READ STEP 1

2. Double click somewhere in the frequency table

3. Select the values you want to include in the Pie chart (note not to include the total)

4. **RIGHT** click on the selection

5. Click on **Create Graph**

6. Click on **Dot**
