SPSS: Pie chart (from a table)

This document will explain how to generate a Pie-chart using SPSS a frequency table.

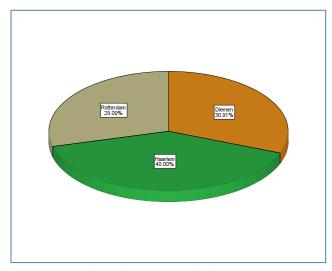

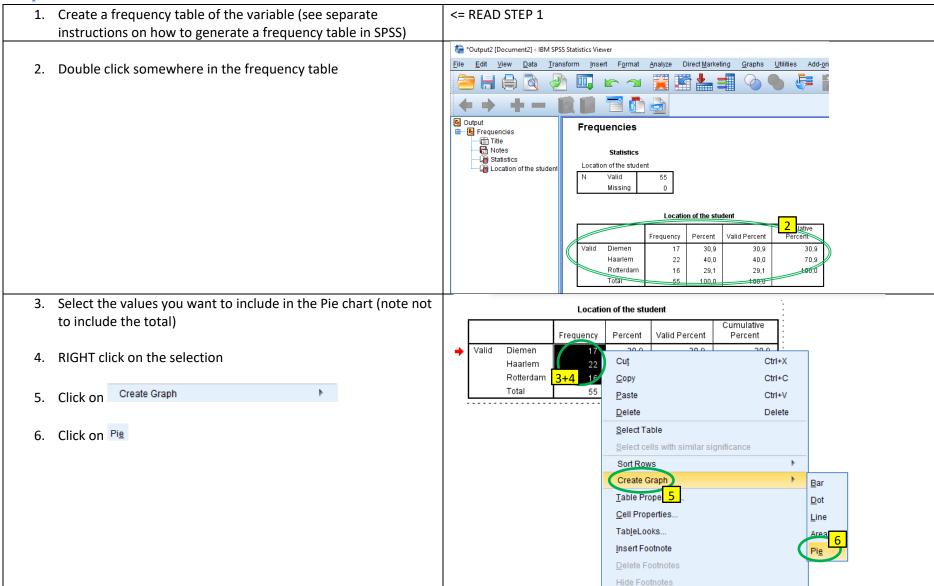

Figure 1. Example Pie-chart generated with SPSS

The described steps are also shown in the Youtube video at: https://youtu.be/v4uG28E12Lc.

The example file used is *StudentStatistics.sav* available on the companion website http://PeterStatistics.com.

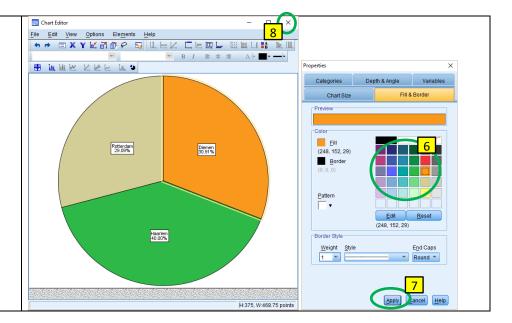

The pie chart itself

Changing the color of the slices

changing the color of the shees	T
DOUBLE-click in the output on the pie-chart to open the Chart Editor	<= READ
Click on the slice of which you want to change the color (the entire circle will now be selected)	<= READ
Click again on the slice you want to change the color of (now only this slice remains selected)	
	Properties X
4. Click in the Properties window on the Fill & Border tab	Categories Depth & Angle Variables Chart Size Fill & Border 4
NOTE:	Preview
If you do not see the Properties window, you can click in the menubar on	Colo 5
Edit and then on Properties (or use the shortcut CTRL+T, or the shortcut	(62, 88, 172)
button 🗉)	<u>B</u> order
	(0, 0, 0)
5. Click on the color square next to Fill	
·	Pattern Patter
	Edit Reset
<i>Note</i> : If the Fill square is locked locked you probably clicked too many times	(62, 88, 172)
on the slice (or too fast). Click once outside the circle, then click on the	Border Style—
slice, wait a second or two and click again on the slice. It should become	Weight Style End Caps
available now.	1 T Round T
	Apply Cancel Help

- 6. Click on the color you want for the slice
- 7. Click on Apply
- 8. Close the Chart Editor by clicking on \times (don't worry the revised chart will show in the output).

Adding a 3D effect

- 1. **DOUBLE**-click in the output on the pie-chart to open the Chart Editor
- 2. Click on one of the slices, so the the entire circle is selected
- 3. Click in the Properties window on the tab.

NOTE:

If you do not see the Properties window, you can click in the menubar on *Edit* and then on *Properties* (or use the shortcut CTRL+T, or the shortcut button (a))

- 4. Click on 3-D
- 5. Type at Distance a 1
- 6. Click on Apply
- 7. Close the Chart Editor by clicking on \times (don't worry the revised chart will show in the output).
